(EAN-Code)

HandyLaser

HandyLaser Compact
The housing of the HandyLaser Compact includes two spring clips for securing the HandyLaser Compact to the reference tile.

Innovative Design
The compact design is a major advantage when working in confined spaces.

HandyLaser Compact
Combines the advantages of a universal laser spirit level with outstandingly compact dimensions. Vial precision 0.5 mm / 1 m.

Incl.: adjustable feet and batteries

8 **025.03.00A**

Compact Base
For tripod applications with HandyLaser Compact. 5/8" thread, 360° rotation with adjustable angle scale. Fast alignment to the millimetre thanks to adjusting screw. For HandyLaser Compact only.

5 **025.78A**

90° Pentaprism Mag.
For vertical levelling and for right angles. Deflects the laser beam by precisely 90°. Can be rotated through 360°. With magnetic coupling. For HandyLaser Compact.

5 **025.70A**

90° Beam Splitter Mag.
For vertical levelling and for right angles. Generates two beams at a 90° angle. One can be rotated through 360°, the other provides a fixed reference beam. With magnetic coupling. For HandyLaser Compact.

5 **025.71A**

Reflex Target Plate
with clamp holder and dual scale.

1 **023.62A**

Laser Enhancement Glasses
for optimum visibility of the laser marking over long distances. Please make sure these are always used in outdoor applications involving red laser instruments.
