Multi-Point Lasers

MultiBeam-Laser 3 ⁽¹⁾

Automatic 3-spot laser with magnetically damped pendulum system – Levels itself automatically within seconds. Pendulum can be locked for protection during transport. Uncomplicated handling: Turning the housing enables horizontal levelling, while with the two perpendicular lasers markings can be easily transferred from the floor to the ceiling. Precision 2 mm / 10 m, self-levelling range 4° – 6°, optical signal when tolerance is exceeded.

MultiBeam-Laser 5 ⁽¹⁾

Automatic 5-spot laser with magnetically damped pendulum system. Pendulum can be locked for protection during transport. All 5 lasers are set at right angles to each other. This makes practically all alignment tasks possible. Additionally, the housing can be turned to enable horizontal levelling, while the two perpendicular lasers allow markings to be easily transferred from the floor to the ceiling. Precision 2 mm / 10 m, self-levelling range 4° – 6°, optical signal when tolerance is exceeded.
