## Green laser technology

Over what distance a laser is visible to the eye depends on the colour or wavelength of the laser beam. This has to do with the physiology of the human eye – green appears brighter to us than red. Depending on the ambient light conditions, therefore, green lasers are many times more visible than red ones – and indeed indoors, up to 12 times more. This allows applications on dark grounds and over longer distances, as well as working in very bright ambient light conditions. The standard for comparing brightness differences is a red laser with 635 nm wavelength.

Unlike red lasers, green laser light can only be generated indirectly. This limits working temperature such that green lasers are darker outside a temperature range of 0 – 40° C or 0 – 50 °C. Energy consumption is also greater, this reduces battery operating time.

Laser 532 nm

Interior finishing and building

SuperCross-Green 3

NEW

Green cross-line lasers with plumb laser and additional reference line

- 2.5° self-levelling range, precision 2 mm / 10 m
- The pivoted housing can be turned with a vernier adjustment mechanism to permit exact positioning of laser lines.
- The removable base allows use either with or without a tripod.
- Straightforward plumb function using laser cross at the top and additional plumb laser.
- Green laser technology with 0 °C ... 40 °C temperature range

**Inclusive:** SuperCross-Green 3, laser enhancement glasses, magnetic target plate, tripod adapter, carrying case, batteries

Greenline-Laser 1 Pro <sup>(1)</sup>

Green line laser for ground applications as well as for horizontal and vertical levelling directly on the wall

- The laser is fixed to the wall using special pins and precisely aligned through the eccentric adjustment.
- Parallel shifts can be performed through the exact alignment of the laser line to the body edges.
- Precision 3 mm / 10 m
- The length and intensity of the laser line can be adjusted.
- Additional magnets on the underside also allow the 1 Pro to be mounted on steel structures.
- Green laser technology with 0 °C ... 40 °C temperature range

**Inclusive:** Greenline-Laser 1 Pro, laser enhancement glasses, rechargeable battery, charger, carrying case

Greenline-Laser 2P <sup>(1)</sup>

Green cross-line laser with plumb laser

- 3° self-levelling range, precision 2 mm / 10 m
- The pivoted housing can be turned with a vernier adjustment mechanism to permit exact positioning of laser lines.
- The removable base allows use either with or without a tripod.
- With additional plumb laser at the top and bottom
- Green laser technology with 0 °C ... 40 °C temperature range

**Inclusive:** Greenline-Laser 2P, laser enhancement glasses, magnetic target plate, base, rechargeable batteries, charger, carrying case
