

Electronic Scanners

Metal, beam and line finding devices

Drilling and screwing jobs have always involved a level of risk. The electronic scanners now keep you clearly informed of what is hidden below the surface of walls, floors and ceilings. They therefore give you the assurance of being able to complete your project quickly, precisely and without unexpected complications.

1
StudScan
Beam / cavity detection

4
Depth measurement
Determining depth

2
MetalScan
Targeted metal detection

5
Metal definition
Ferro- / Nonferro Scan

3
AC-Scan
Targeted wire detection

StarFinder

Electronic device for detecting uprights and beams in indoor walls

- In dry building work, enables you to reliably find stable fixing points, e.g. for wash basins, kitchen cupboards, shelves, heavy mirrors.
- The separate AC mode enables live wires to be specifically searched for and localised.
- High safety is guaranteed by the permanent voltagewarning function.

Inclusive: StarFinder, battery

Metal, beam and line finding devices

TwinFinder

NEW

AUTO CALIBRATION

Electronic detector for metal and live wires

- This device permits targeted scanning for metals such as reinforcing iron, heating pipes and water pipes.
- Locating areas between metal uprights that are free from sub-structures, e.g. for making breakthroughs (kitchen hatches, skylights).
- Voltage warning: more safety when drilling! The AV voltage alarm warns continuously of live, unshielded wires.

Inclusive: TwinFinder, battery

2 3 9V

MetalliFinder

Universal scanning and detection device with depth display

- Enables targeted search for metals such as reinforcing steel, heating pipes and water pipes.
- Also localises and warns of live wires
- The depth measurement function is a valuable aid in deciding whether there is sufficient drilling depth over metal girders, etc.
- Therefore no more accidental drilling into metal water or gas pipes
- Prevents drilling into girders or steel reinforcements when working in walls and masonry
- Pays for itself by avoiding expensive repair work and ugly holes drilled in the wrong place

Inclusive: MetalliFinder, battery

ORDER NO.	EAN-CODE	PU

Metal, beam and line finding devices

MetalliFinder Pro

Universal metal finder with depth display for localising electrically live conductors

- Enables targeted search for metals such as reinforcing steel, heating pipes and water pipes.
- Also localises and warns of live wires
- The depth measurement function is a valuable aid in deciding whether there is sufficient drilling depth over metal girders, etc.
- Therefore no more accidental drilling into metal water or gas pipes
- Prevents drilling into girders or steel reinforcements when working in walls and masonry
- Pays for itself by avoiding expensive repair work and ugly holes drilled in the wrong place
- Large, illuminated display

Inclusive: Metallifinder Pro, battery

ORDER NO.	EAN-CODE	PU
080.951A	4 021563 670291	5

MultiFinder Pro

One for all: Several integrated sensors make the MultiFinder Pro a scanning and detection tool for many different applications

- It is able to detect wood, iron, copper and live wires.
- The user guide on the LC display makes the MultiFinder easy and reliable to use.
- Handling is additionally facilitated by acoustic and optical detection signals.
- High functioning safety is guaranteed through special warning signals.
- Special feature: In metal mode, the MultiFinder Pro is even able to detect concealed lines when they are not live.
- Illuminated display

Inclusive: Multifinder Pro, battery
