

Above and below ground construction

DualAxis Laser

2-axis grade laser of extremely durable design for civil and construction engineering

- 5° self-levelling range, precision 0.5 mm / 10 m
- Deviation from the horizontal plane can set digitally in X and Y axes.
- Laser modes: rotary and hand receiver mode
- High maximum speed of 1100 rpm
- The telescopic sight supplied with the device makes alignment easy
- Large illuminated LCD
- All functions can be controlled remotely using the Commander DAL.

- **optional SensoLite 310**
Laser receiver range up to 300 m radius
- **optional SensoMaster 400**
Laser receiver range in excess of 300 m radius

Telescopic sight for adjusting the DualAxis-Laser

The telescopic sight ensures precision adjustment of the DualAxis-Laser X and Y axes. Simple 90° rotation facilitated by magnetic fastening.

DualAxis Laser 310 S incl.: DualAxis Laser, SensoLite 310, universal mount, Commander DAL, telescopic sight, rechargeable batteries, charger, carrying case, batteries
