

MetalliFinder

Metal detection with depth display
and voltage warning.

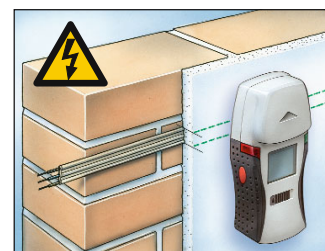

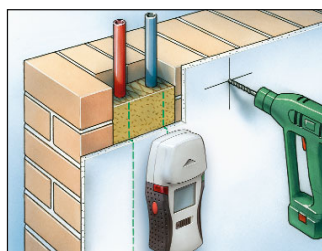

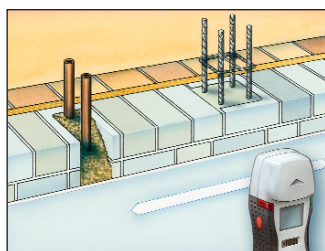

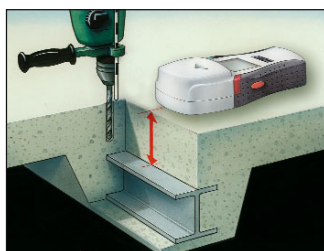

New

MetalliFinder

High performance metal detection device with depth display and voltage warning. Enables targeted location of metal objects as heating and water pipes. Easy handling by extra large LC-Display.

- Through depth measuring it can be decided if the drilling depth is sufficient in front of metal cores etc.
- Means no more accidentally drilling into water or gas pipes made of metal.
- The course of underground canals can be determined reliably.
- Ensures safe and reliable working – prevention of destruction of precious drillers, drill bits and cutting blades.
- When drilling into or fitting to stone, the device means that drilling into girders or reinforcing rods can be avoided.
- Cost-saving – avoidance of drilling in the wrong place with the subsequent repair work this involves.
