

LaserRange-Master X2

Compact laser distance meter –
measures exactly to the point

Rev.1.111

Point-precise measuring with laser light:
allows the measurement to be made exact.

1. Simple interior height measurement with triple Pythagoras measurement function:
the height will be calculated automatically.

– Additional **angle indication**.

2. + 3. The Area and Volume function captures room sizes. This allows quick calculations, e.g. for material quantities.

– **Addition and subtraction of lengths.**

– With the **area-addition function** wall surfaces can be immediately calculated.

– **Consistent high measuring accuracy**
up to 25 m: ± 3 mm.

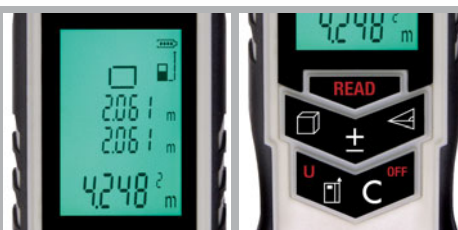

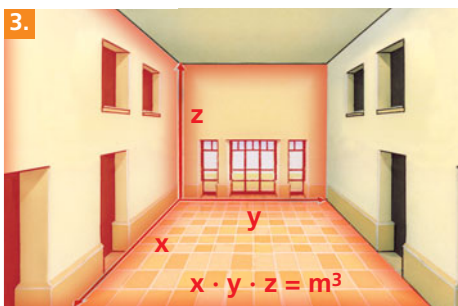

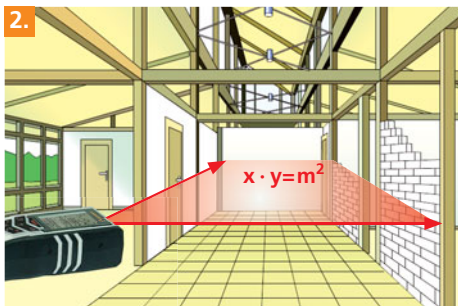

– **Inside measurement range: 0.5 m to 25 m.**

– **2 selectable measurement reference points,**
front, tripod, rear and pin

– **Max function** to determine diagonals

– **Min function** to determine shortest distance

– **Illuminated LC display**

Illuminated display

Multi purpose functions

TECHNICAL DATA	
ACCURACY	± 3 mm
MEASUREMENT RANGE	max. 25 m
MINIMUM RANGE	0,5 m
LASER	Class 2, < 1mW
LASER WAVELENGTH	650 nm
OPERATING TEMPERATURE	0° – 40°C
UNIT	m / ' " / inch / ft (selectable)
FUNCTIONS	Pythagoras 1,2,3, areas, volumes, addition and subtraction of lengths, addition of areas, angle indication, min / max continuous measurement
POWER SUPPLY	Batteries 2 x 1,5 V Typ AAA
DIMENSIONS (B x H x D)	43 x 110 x 28 mm
WEIGHT with batteries:	0,110 kg

LaserRange-Master X2
inclusive softbag
+ batteries

Packaging dimension (B x H x D)
110 x 235 x 82 mm
