## MetalliFinder Pro

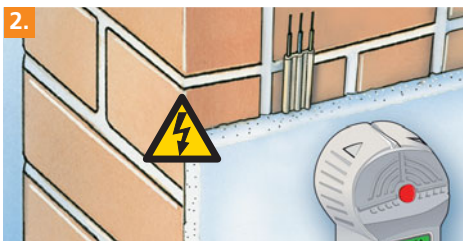

Universal metal detector with depth display. Localisation of live wires.

Rev. 1009

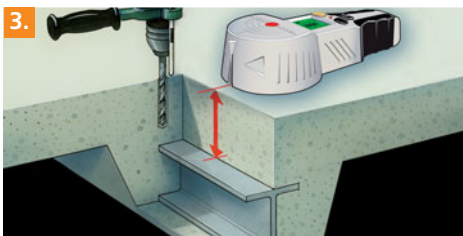

High performance metal detection device with depth display and voltage warning. Enables targeted location of metal objects as heating and water pipes. Easy handling by extra large LC-Display.

– Through **depth measuring** it can be decided if the drilling depth is sufficient in front of metal cores etc.

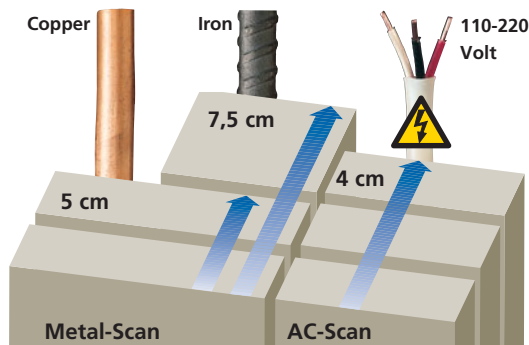

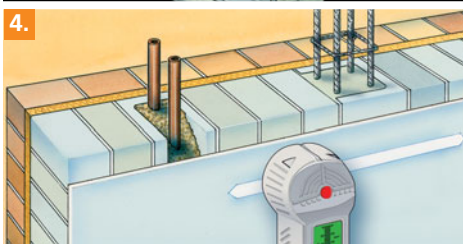

– **Means no more accidentally drilling into water or gas pipes made of metal.**

– **Ensures safe and reliable working:** prevention of destruction of precious drillers, drill bits and cutting blades.

– **Cost-saving:** avoidance of drilling in the wrong place with the subsequence repair work this involves.

– **Illuminated LC display**

### TECHNICAL DATA

**WORKING TEMPERATURE:**  
0°C...40°C (32°F...104°F)

**STORAGE TEMPERATURE:**  
-20°C ... 70°C

**POWER SUPPLY:**  
1 x 9V alkali battery (type 6LR 61)

**DIMENSIONS:**  
95 mm x 221 mm x 85 mm

**Article No: 080.951A**

EAN-Code: 4 021563 670291

**MetalliFinder Pro**  
+ battery  
PU 5

### OVERVIEW

<b>1</b> Targeted metal location: Ferro-Scan/Non-Ferro-Scan (Metal-Scan)	Up to 7.5 cm/up to 5 cm depth
<b>2</b> Targeted location of live supply lines (AC-Scan)	Up to 4 cm depth
<b>3</b> Determination of drilling depth	In 5 mm increments
<b>4</b> Determination of type of metal (Ferro/Non-Ferro-Scan)	Yes
Automatic calibration	Yes
Display	LCD with depth display
Detection and warning information	Visual and audible
