

SensoPilot Pro and Remote Display

New

Automatic construction machine control – efficient and reliable.

SensoPilot Pro

Machine laser receiver for construction machine control. In combination with a rotary laser, the SensoPilot serves as a continuous guide for height control. Its four laser receiver units each have a length of 25 cm that can receive the laser beam in a 360° radius. Large, very visible LEDs show the laser's level. Its range is 200 m. Very robust, water and dust-proof housing, powerful magnets fasten the unit to the machine.

Includes:

Integrated rechargeable battery, battery charger, 12/24 V battery cable and case.

Remote Display for SensoPilot

This remote display allows reference height to be monitored from the driver's seat of the construction machine. This is the ideal complement for the SensoPilot mobile laser receiver. Very robust design with mounting socket, water and dust-proof housing.

Includes:

Connection cable for SensoPilot.

Order No. SensoPilot Pro: 035.00A

Order No. Remote Display: 035.01
