

Compact Video Inspector – visual inspection of difficult accessible areas

Rev. 11/08

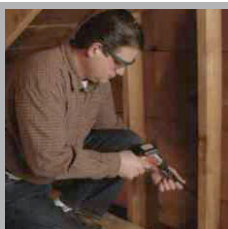

- **The camera head at a flexible fibroscope** transfers pictures directly to a LCD-Monitor.
- **Problem locating:** the camera indicates what is behind or in objects, walls circuits or cables etc. even under worst light conditions, due to the LED-lighting.
- **Waterproof camera head and cable.**
- **The compact device** can be used everywhere.
- **Diversified application** with 1 m flex fibroscope which can be prolonged up to 2 m.
- **Extraneous light reduction:** contrasty LC-Display which provides an optimum display even under light irradiation.
- **Multilingual On-Screen-Display.**
- **Ideal for difficult accessible areas** due to the very small measuring head.
- **REC-Function:** the exposures can be recorded on the integrated SD-Card for a later analysis.
- **Formattable SD-Card.**
- **USB 2.0 Interface for PC.**
