

Laser Distance Meter

Safety regulations

Please read the safety regulations and operation guide carefully before operating.

- ⚠ Please read all of the operational guide and safety regulations in this manual before operation. Improper operations without complying with this manual guided could cause damage to the device, influence on measurement result or bodily injury to the user.
- ⚠ The instrument is not allowed to disassemble or repair in any ways. It is forbidden to do any illegal modification or performance change for laser emitter. Please keep it out of reach of children and avoid using by any irrelevant personnel.
- ⚠ It is strictly prohibited to shoot eyes or other parts of body with the laser; it is not allowed take the laser to shoot any objects' surface with strong reflecting.
- ⚠ Due to electromagnetic radiation interference to other equipment and devices, please don't use the meter in the plane or around medical equipment, don't use it in inflammable, explosive environment.
- ⚠ Discarded batteries or meter device shall not processed just like household garbage, please handle them in line with related law and regulations.
- ⚠ Any quality issues or any questions on the meter, please contact local distributors or manufacturer in time, we are ready to offer solutions for you.

User's Manual

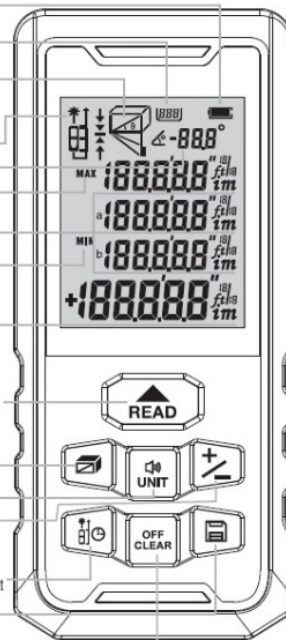

DISPLAY/KEYBOARD

• Display

- Power Supply
- Record
- Length, Area, Volume and Pythagorean
- Laser on
- Angle
- Maximum
- Auxiliary Display
- Minimum
- Major Display

• Keyboard

- Turn on/Measuring
- Area/Volume/Pythagorean Measuring
- Unit/Sound
- Addition/Subtraction
- Reference Point/Delay Measurement
- Save
- Turn off/Clear up

Battery Installation

- Discharge the battery door on the back of device, and place battery according to correct polarity, then cover the battery door.
- Only 1.5 V AAA alkaline battery is applied to the meter.
- If not used for a long time, please take out the battery to avoid battery corrosion to meter body.

Start and Settings

• Turn on/off the Instrument

Under off status, press button , device and laser get starting simultaneously and stand by for measurement.

Under on status, long press button for 3 seconds to turn off the device. The device can also be off without any operation for 150 seconds.

• Unit setting

Under the length measuring mode, long press button , reset current measurement unit, default unit is: 0.000m. There are 6 units for selection.

Units:

Length	Area	Volume
0.000m	0.000m ²	0.000m ³
0.00m	0.00m ²	0.00m ³
0.0in	0.00ft ²	0.00ft ³
0.00ft	0.00ft ²	0.00ft ³
0 1/16in	0.00ft ²	0.00ft ³

Self-Calibration

This function can keep the precision of the device. Instruction: Power off, press button and till "CAL" and a figure under it display on the screen. User can adjust the figure with button , according to the accuracy of the meter. Adjusting range: -9 to 9mm, then press button to save the calibration result.

0'00"1/16 0.00ft" 0.00ft"

- **Changing Reference Point**
Short press key to change the reference point . System default reference point is bottom.
- **Delay Measurement**
Long press , a second number shows in the screen . User can press or to adjust the time between 3s to 60s.
Press to start count down, the measure start when the time turns to 0.
- **Back Light On/Off**
The back light is set to turn on and off automatically. The back light can be on for 15s while operating, and it will be shut off automatically in 15s when there is no operation to the device.
- **Sound on/off**
Short press button to turn on or off the buzzer.

Length Measurement & Calculation

- **Single Distance Measuring:**
Short press to turn on the laser beam under measuring mode. Press the button again for single measurement of length, then the measured results displayed in the major display area.
- **Continuous Measuring:**
Long press button under measuring mode and enter into continuous measuring mode. Maximum and Minimum measuring result display in auxiliary display area, present result displays in major display area. Short press button or to exit continuous measuring mode.

- **Area Measurement:**
Press button once , shows on the screen. One of the side of rectangle blinking on the display, please follow the below instructions for area measuring:
Press once for length
Press again for width
The device calculates and shows the result in the major display area.
The resent measuring result of length is showed in the auxiliary display area .
Press , clear off the result and measuring again if necessary.
Press again to exit the mode.

- **Volume Measurement**
Press button twice to enter volume measurement mode. A will shows on the top of screen. Please follow the below instruction for volume measuring:
Press for Length
Press again for Width
Press thirdly for height
The device calculates and shows the result in the major display area.
The resent measuring result of length is showed in the auxiliary display area.
Press , clear off the result and measuring again if necessary.
Press again to exit the mode.

Painter Function

When the meter is in area mode, you can use the add / subtract function to total up the area of several surfaces.

Press button three times till showing in the display.
Press to measure the height of the wall first;
Press to measure the bottom edge of the first wall, get the first area in the major display area;
Press to measure the bottom edge of another wall, get the sum of these two walls.

Repeat these operations for more walls. Press button to clear the previous measuring result and start new measurement.

When there is no data in the Auxiliary Display area, press to exit the mode.

● Pythagoras

There are four Pythagoras modes in case that user gets difficulties to measure directly.

1. Calculate the length of two legs by measuring the hypotenuse and the angle.

Short press four times, when the hypotenuse of blinking,

Press , measure the length of hypotenuse (a), and calculates the angle (α) between the bevel and the bottom at the same time.

Device calculates the horizontal distance (b) and vertical height (h).

2. Calculate the hypotenuse by measuring the length of two legs.
Short press five times, when one leg of blinking,
Press , measure the length of one leg (a)
Press , measure the length of another leg (b)
Device calculates the length of hypotenuse (x)

3. Press six times till the one side of blinking on the screen.
Press , measure the length of one side (a)
Press , measure the length of the median line (b)
Press , measure the length of another side (c)
Device calculates the length of the leg in full line (x)

4. Press seven times till the hypotenuse of blinking on the screen.
Press , measure the length of one hypotenuse (a)
Press , measure the length of another hypotenuse (b)
Press , measure the length of one leg (c)
Device calculates the length of the leg in full line (x)

Legs must short than hypotenuse, or there will be "err" shows on screen. In order to guarantee the accuracy, please make sure all measurements are start from the same point.

● Addition / subtraction

The device can be used for length addition and subtraction. Press to select the function once get the length measuring result.

Press , "+" shows in the major display area, entering cumulation mode. Value of last measurement and the result of cumulation will be showed on the screen.

Press again, "-" shows in the major display area, entering regressive mode. Value of last measurement and the result of cumulation will be showed on the screen.

Can choose the addition or subtraction mode by pressing the button .

Not only length can be calculated in addition and subtraction, but area and volume can do the calculation as well. Take area as example:

Area cumulative function: Measure the first area as showing in PIC1. Then press button , and measure the second area as showing in PIC2, there is a "+" in the left bottom. At last, press button to get the summation result of these two areas which is showing in PIC3.

Memory Function

Long press button for 3s to record your measuring result under measuring mode.

It can also record the result under Area, Volume and Pythagoras mode. All the calculating records can be saved by the device.

● Read / Delete the Record:

Short press button , read the records by press button and . Short press to delete recent record and long press to clear up all the records. Press or to exit record mode.

When the storage is full, the screen will display the [Err] mark.

● Angle measurement

The angle information is displayed at the top of the screen, and the angle measurement range is -90.0° to 90.0°.

Tips

You may get some warning information as below:

Info message	Cause	Solution
Err	Out of distance measurement range	Use the device within the range
Err1	Signal is too weak	Choose the surface with stronger reflectance. Use the reflecting plate.
Err2	Signal is too strong	Choose the surface with weaker reflectance. Use the reflecting plate.
Err3	Low battery voltage	Change the power supply.
Err4	The working temperature is out of working range	Use the device in the specified temperature.
Err5	Pythagoras measuring error.	Re-measure and ensure that Hypotenuse is bigger than Cathetus.
Err6	Angle sensor error	Depot Repair

12

Technology specifications:

ITEM	SPECIFICATIONS			
	50m	70m	100m	120m
Working Range	50m	70m	100m	120m
Distance measurement precision	±2mm *			
Continuous measurement function	yes			
Area measurement function	yes			
Volume measurement function	yes			
Pythagorean proposition measurement function	Full mode			
Painter function	yes			
Angle Function	yes			
Add and subtract measurement function	yes			
Min/Max value	yes			
Self-Calibration	yes			
Laser level	II			
Laser type	500-635nm, <1mW			
Max storage	99units			
Automatically out off laser	20s			
Automatic shutdown	150s			
Battery life	8000 times for single measurement			
Buttons/keys sound	yes			
Storage temperature	-20°C~60°C			
Working temperature	0°C~40°C			
Storage humidity	20%~80%RH			
Battery	3x1.5V AAA			
Angle Range	±90°			
Dimension	118x52x27mm			

Note: Use a target plate to increase the measurement range during daylight or if the target has poor reflection properties.

13

* Typical Tolerance: ±2mm, when reflectivity 100% (white surface), environment light <2000 LUX, 25°C
Tolerance is usually affected by the distance, reflectivity, and environment light etc. It probably gets tolerance around ± (2mm+0.2mm/m) .

Instrument Maintenance:

- The meter should not be stored in high temperature and strong humidity environment for long time; if it is not used very often, please take out the battery and place the meter in the allocated portable bag and store in cool and dry place.
- Please keep the device surface cleaning. Wet soft cloth is applied to clean dust, but erosion liquid is never allowed to use for the meter maintenance. Laser output window and its focus lens can be maintained according to maintenance procedures for optical device.

Delivery Package

Please check if the accessories are completed according to the below list.

NO.	Item	Unit	QTY	Note
1	Laser distance meter	pc	1	
2	Portable bag	pc	1	
3	Handstrap	pc	1	
4	Power supply AAA	pc	3	
5	User's manual	pc	1	
6	Gift box	pc	1
