

# Spot-On LaserChalkLine X2

The Spot-On LCLX2 LaserChalkLine is a professional self-levelling cross line laser level with ultra bright 30mw green Osram laser diodes.

Recommended for jobsite horizontal and vertical levelling and alignment applications.

## Special New Features

This new updated version of the iconic model now includes rechargeable li-ion batteries and an on/off slide switch with a sensor lock for transit protection.

## Switching Sequence

- 1 Move slide switch to the left to switch-on the horizontal laser line
2. Press the vertical line button on the keypad for the vertical laser line.
3. Press and hold the vertical line button to reduce the line brightness and width, (2-steps)
- 4 .Press and hold the horizontal line button to increase the brightness, (4-steps)
- 5 Move the slide switch to the right to switch-off and lock the sensor
6. Using the keypad button individual laser lines can be selected

## Battery Installation

The set includes a USB mains charger, two li-ion battery packs and a USB connection cable

The battery packs have a USB-C port and can be recharged directly from the mains supply.

Please ensure that the battery pack is inserted with the contacts end first!

## Exterior Use

The laser is has a constant pulse function for use with a receiver, (not included) for exterior levelling and alignment jobs up to 50m under most daylight conditions.
