Laser distance measuring tape

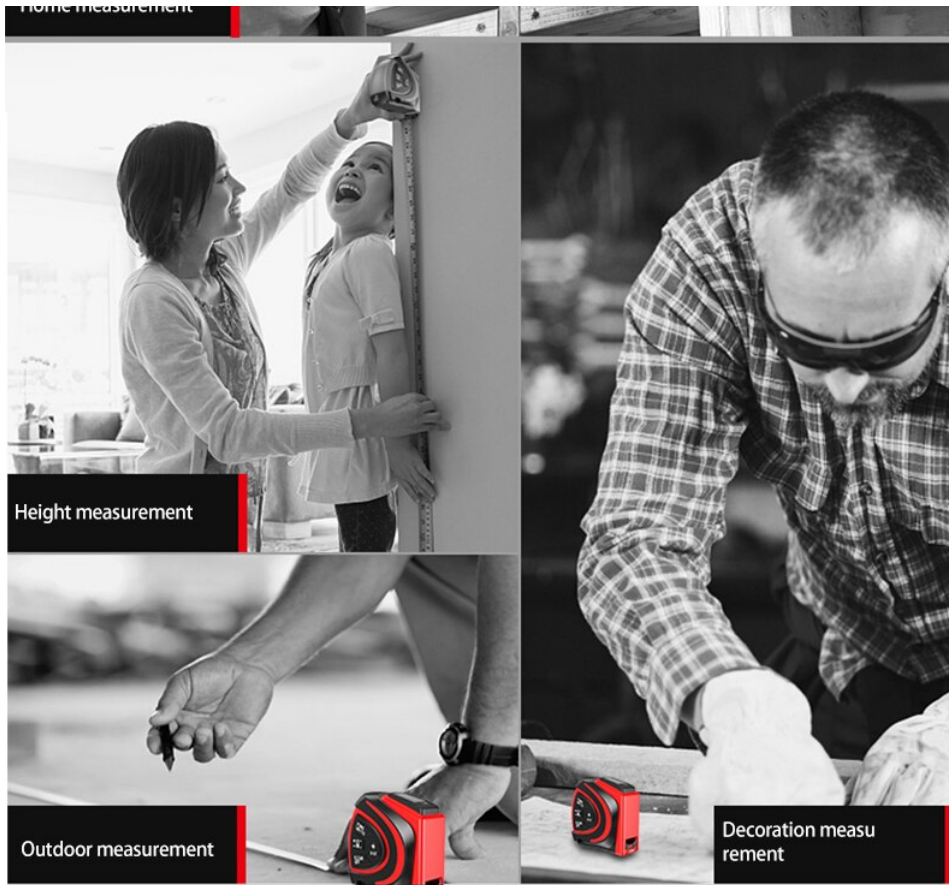

Precision / Convenience / Simple

Multi-scenario application Solve various job requirements

Home measurement

Laser tape measure

The ruler is long, the distance is not a problem.

Imported optical filter lens

Ultra-precise filter lens Filtering stray light Sensing subtle changes

Energy saving night market HD digital display

LCD backlit display data at a glance
Convenient to use in dark conditions

Indoor and outdoor is a professional optical system

Built-in intelligent optical compensation system to meet various measurement needs

Indoor

cloudy day

outdoor

Backlighting

Intelligent Technology

USB straight flush, bid farewell to replace the battery
Charge once, you can use one week

Fully charged for continuous use

5000+ times

Intelligent Technology

One piece

Imported ABS soft plastic shell
Waterproof, dustproof and drop resistant

50 sets of intelligent data records

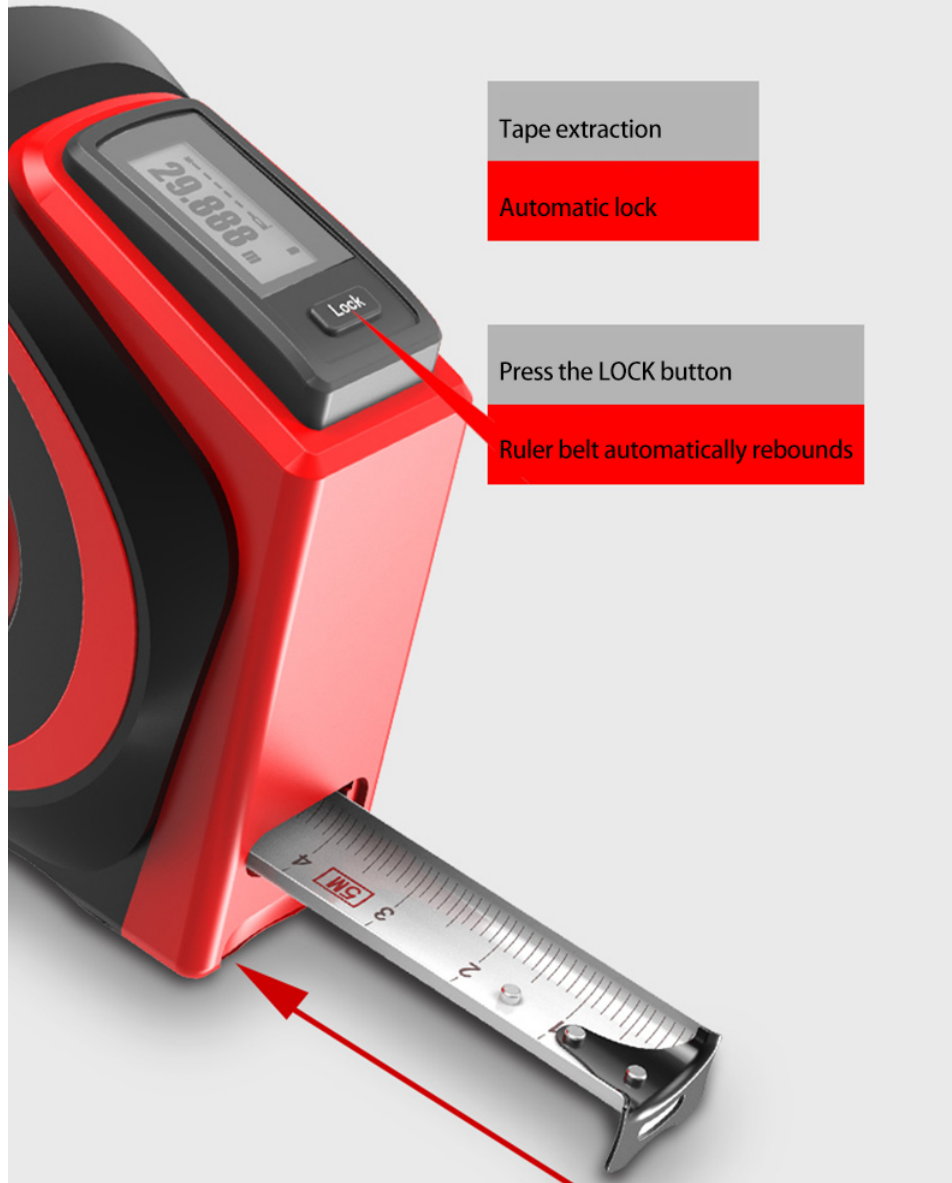

Important data is not lost.

- Reverse data display
- Housing area data
- Door and window length and width data
- Pythagorean data

Self-locking does not hurt the hand

Activity ruler hook design self-correction 1mm
More accurate use of ranging

Tape extraction

Automatic lock

Press the LOCK button

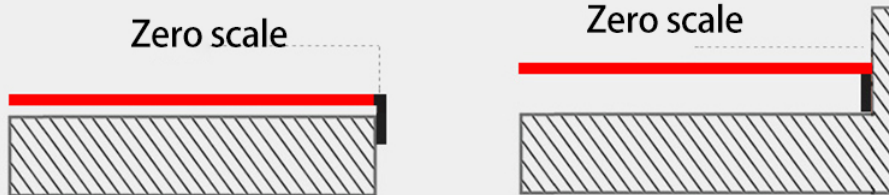

Ruler belt automatically rebounds

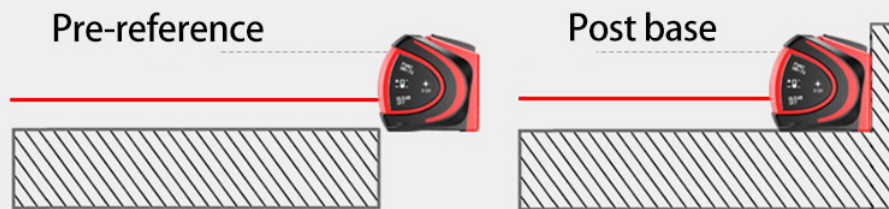

Benchmark compensation

Make every millimeter accurate

When the tape measure is measured, the ruler hook is active.
The top test can be moved to within zero scale, and the hook test can be moved beyond the zero scale.

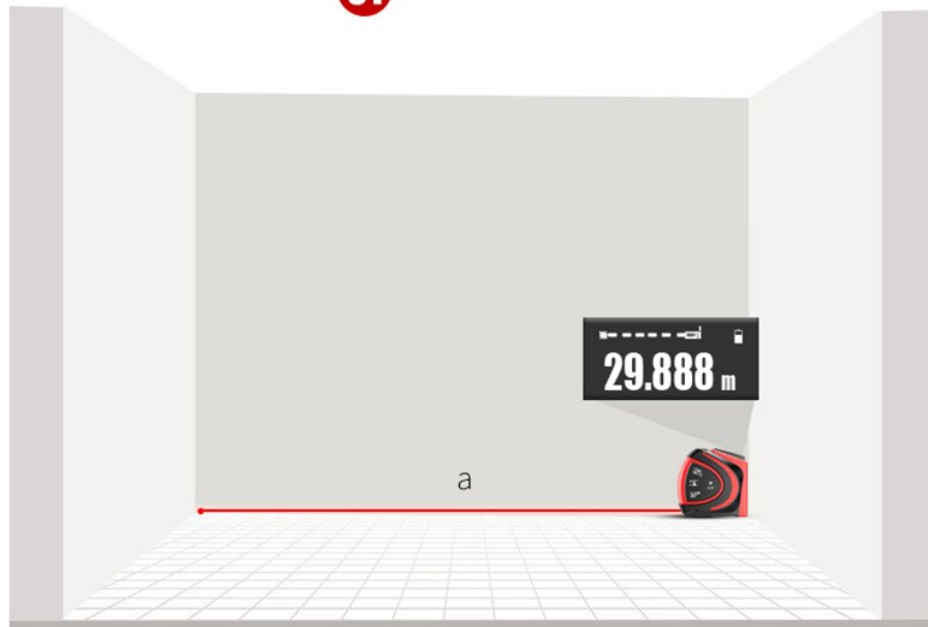

Adjusting the reference position during laser measurement
Adjustable to rear reference when there is blocking at the rear
Both front and rear benchmarks are available when there is no blocking at the rear

Multiple measurement modes

Measuring distance / side area / measuring volume / Pythagorean measurement

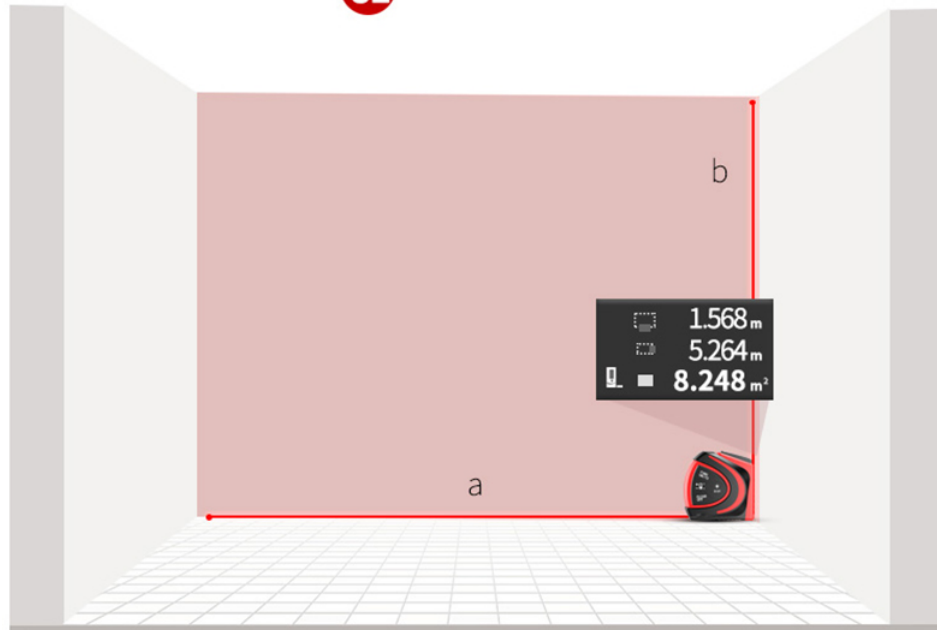

01 Measuring length

1. Short press 2 times DIST button to boot

2. Laser red dot is aimed at the target again by DIST

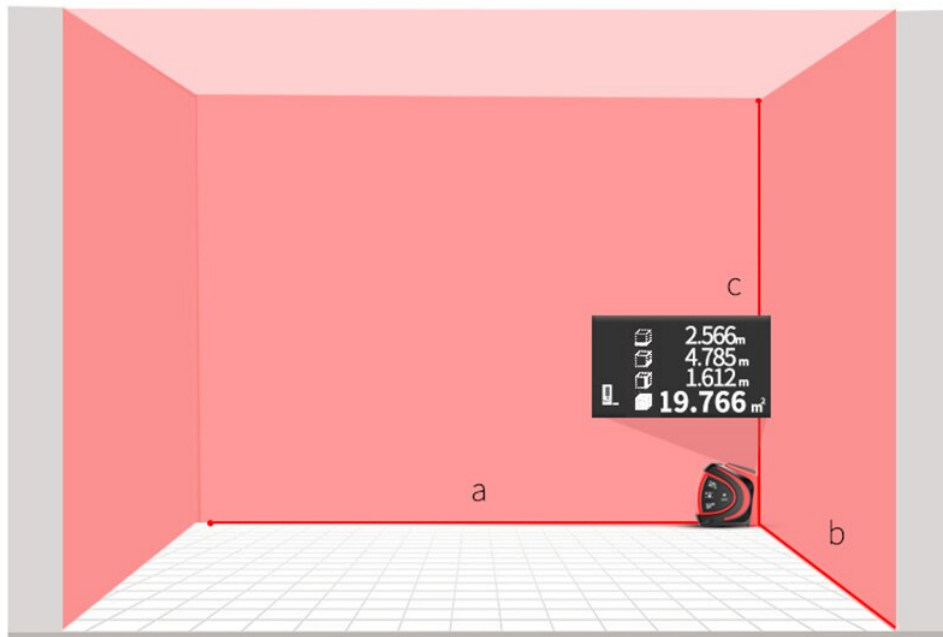

02 Measuring area

1. Short press 2 times DIST button to boot

2. Press the FUNC UNITS button to switch to the free measurement mode.

3. Press the DIST button to measure the length and width in turn to get the area.

03 Measuring volume

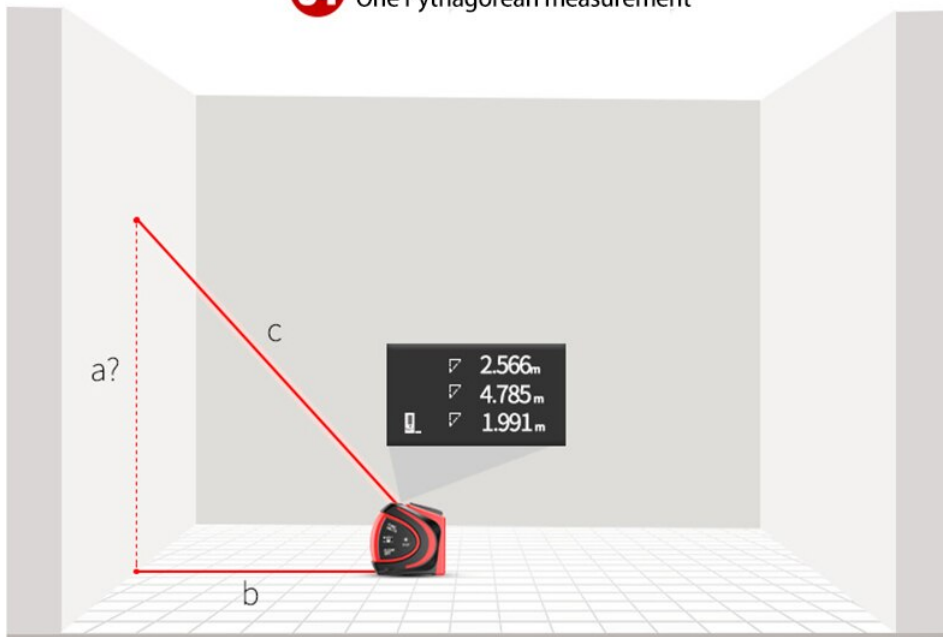

1. Short press 2 times DIST button to boot

2. Press FUNC UNITS to switch to volume measurement mode

3. Press the DIST button to measure the length and width in turn to get the volume.

04 One Pythagorean measurement

1. Short press 2 times DIST button to boot

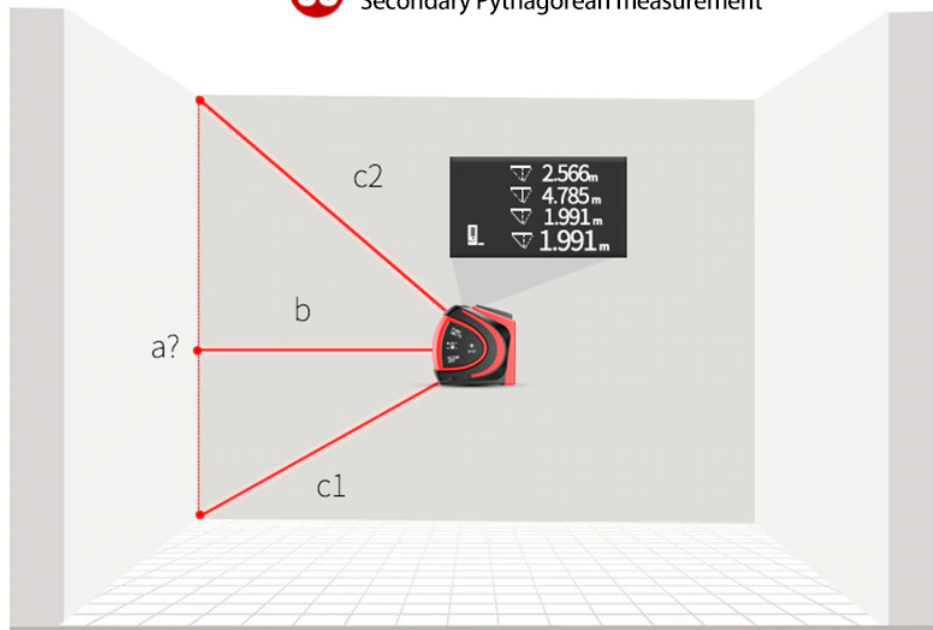

2. Press FUNC UNITS to switch to on-time PIP measurement

3. Press the DIST button to measure the right side edge and the bevel edge to get the height.

05

Secondary Pythagorean measurement

1. Short press 2 times DIST T button to boot

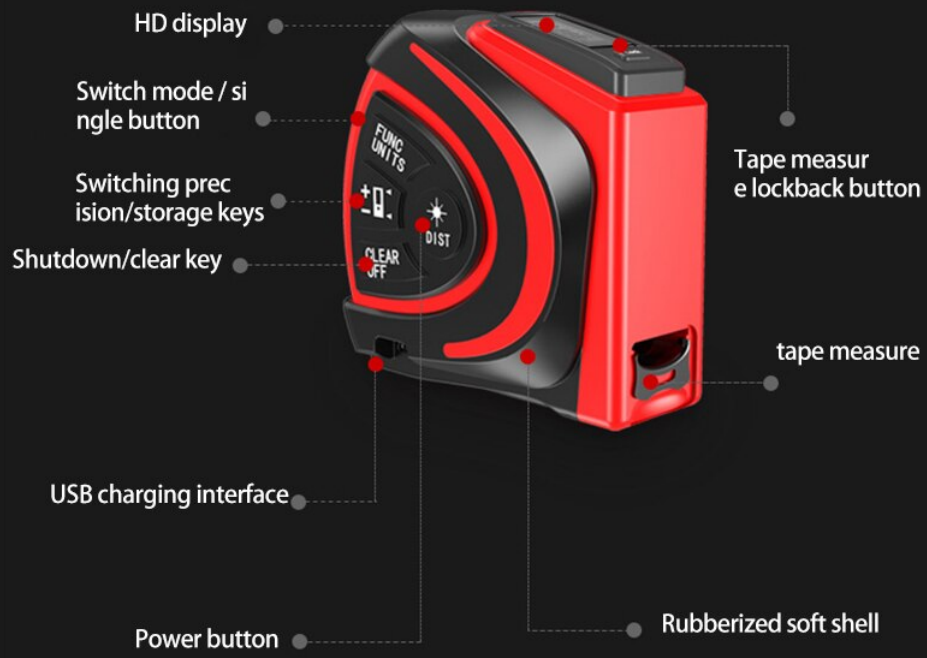

2. Press FUNC UNITS to switch to quadratic Pythagorean measurement

3. Press the DIST button to measure the right angle side and the two oblique sides to get the height.

Product parameters

Ingenuity polishing

Range	Laser: 30m	Key face	≥100万
	Tape measure: 5m	type of battery	环保锂电
unit	m/in/ft/in	Area measurement	✓
Dimensions	82.5*80.4*41mm	Volume measurement	✓
Body weight	0.3kg	Pythagorean measurement	✓
Storing data	50 groups	Distance measurement	✓

function button

- Short press: switch measurement mode
- Every 2 seconds: switch measurement unit
- Short press: addition and subtraction
- Storage data switching
- Long press: switch benchmark
- Short press: delete data
- Long press: Shut down
- Power on: press 2 times in succession
- Long press: continuous measurement

No Feedback.
